

# ANNUAL INDEX

# 1962

## technical articles

volumes 48 and 49

All articles published in the Technical section of THE TOOL AND MANUFACTURING ENGINEER during 1962 are listed in alphabetical order in this index. Also listed are the authors of all articles. These listings include Gadgets and Tech Digests departments.

A highly reliable source of information, this index will be of use to you in the coming years as a record of the engineering information published by TME—the official publication of your Society.

THE **tool** AND **manufacturing engineer**

AMERICAN SOCIETY OF TOOL AND MANUFACTURING ENGINEERS  
10700 PURITAN AVENUE • DETROIT 38, MICHIGAN

# 1962 AUTHOR INDEX

## -A-

- Adams, F. A.—Indexing Fixture for Drilling Radial Holes\*, June p. 63  
 Albertin, L. and C. C. Lacy—Heat Treat Technique\*, June p. 178  
 Albrecht, Paul—Metalcutting Vibrations\*, May p. 276  
 Ames, Robert S., J. Byron Jones, Florence R. Meyer, R. J. Lamy, D. H. Lane, C. A. Forbes and H. E. Ricks—Applied Ultrasonics\*, May p. 281  
 Anter, Rudy—Cut Your Tool Costs Through Scientific Management, Apr. p. 81  
 Aoki, Isao and Tomojiro Tottori—Oxygen-Lanced Cast Iron\*, July p. 148  
 Aslakson, R. C.—Sheet Forming Plastics\*, Feb. p. 162  
 Avitzur, Betzalel—Wire Drawing\*, Oct. p. 171  
 Ayvazian, A. M. and C. R. Hyland—Taking Short Cuts with Epoxy Plastic Tooling, May p. 103

## -B-

- Barker, M. G.—Indicator Mounting Increases Machine Accuracy\*, Feb. p. 60  
 Bartin, Chester S.—Cutting Tool Control—organized program gets results, Dec. p. 71  
 Bartok, S. Robert—Cold Extrusion\*, Aug. p. 524  
 Beebe, Alexander M., Jr.—Maintenance Evaluation\*, Mar. p. 196  
 Beggs, Harry G.—What Management Expects from Machine Tool Distributors\*, Jan. p. 159  
 Bell, J. W. and P. J. Sim—Optical Tooling Checks Furnace Roll Alignment, Mar. p. 99  
 Biegl, John E.—Punch-Die Clearances—Their Effects on Stamping Forces, July p. 89  
 Biehl, H. R.—Inspection of Powder Metal Parts\*, Oct. p. 173  
 Black, T. W.—Advance Manufacturing Planning—key to job shop efficiency, Aug. p. 43  
 Engineering for Efficiency, May p. 81  
 Engineering with Ideas—A Look at Space-Age Manufacturing Research, Apr. p. 111  
 Fundamentals of Vibratory Finishing, Nov. p. 93  
 High-speed Honeycomb Contouring—Band-sawing Does the Job, Mar. p. 85  
 Lasers Cast Light on Machining, Welding Problems, June p. 85  
 Manufacturing Planning Pays Off—Puts Fluid Power in Polaris, Jan. p. 81  
 Short-Order Manufacturing Department Cooks Up Lead Time Savings, Sept. p. 83  
 The Role of Science in Soviet Industry, July p. 63  
 Tips on Writing Engineering Reports, Feb. p. 72  
 West Coast Industry, Sept. p. 123  
 Bocharov, Y., S. Kobayashi and E. G. Thomsen—Research in Coining\*, May p. 279  
 Brachman, R. J., G. Staton and A. Chalfin—Diagnosing Failures\*, July p. 147  
 Bracken, William O.—Blow Molding\*, Feb. p. 163  
 Breen, John M.—Die Design Promotes Press Safety\*, Mar. p. 81  
 Brenner, Walter—New Electronic Plastics\*, Oct. p. 174  
 Brewer, R. C. and K. K. Punja—Orthogonal Machining\*, Nov. p. 189  
 Bright, R. Louis—From Westinghouse Research\*, Aug. p. 522  
 Broderick, R. F. and E. A. Rothman—Shot-Peening Aluminum\*, Oct. p. 172  
 Brothers, A. J. and S. Yukawa—Prestressed Steel\*, July p. 147  
 Brown, R. D., R. A. Burton and P. M. Ku—Friction and Wear of Cermet\*, Mar. p. 194  
 Brownell, Clifford—Numerically Controlled Indexer Eliminates Drill Fixtures, Dec. p. 100  
 Buescher, W. E., R. Silverman and L. S. Castleman—Properties to Order\*, Nov. p. 188  
 Burrage, B.—Drafting Board Guard Improves Drawings\*, Nov. p. 81  
 Burton, R. A., R. D. Brown, and P. M. Ku—Friction and Wear of Cermet\*, Mar. p. 194  
 Burt, Frank—Milling Machine Fixture Rolls Curved Parts\*, Apr. p. 87

## -C-

- Calenoff, Raymond—Inspections and Preventive Maintenance\*, Mar. p. 197  
 Castleman, L. S., W. E. Buescher and R. Silverman—Properties to Order\*, Nov. p. 188

\*Brief article less than 1 page.

- Cavagnero, Erman V.—Getting Top Quality Springs Through Setup Control, Apr. p. 101  
 Chalfin, A. G. Staton and R. J. Brachman—Diagnosing Failures\*, July p. 147  
 Chopra, S. N., W. B. Rice and R. Salmon—Chip Formation\*, Oct. p. 172  
 Cola, R. R. and J. Frisch—Effects of Electrolytic Grinding\*, May p. 279  
 Conn, Harry—When Portable Punches Save Money, Sept. p. 95  
 Cook, N. H., D. M. Gujral and V. A. Tipnis—Higher Speeds for Punch Presses? May p. 97  
 Cooper, H., Charles H. Fogarty and Robert E. Wilbert—Production Flexibility\*, June p. 177  
 Corbett, Stanley W.—Organization Comes to the Toolcrib, Oct. p. 83  
 Coville, David M.—How to Measure the Effectiveness of Manufacturing Planning, Aug. p. 62  
 Cox, D. B., E. A. Oberight and R. J. Green—Radiation and Lubricants\*, Feb. p. 164  
 Crain, Chester R.—Open Setup Inspection of Functionally Dimensioned Parts, Oct. p. 79  
 Crewe, L. C., Jr. and E. J. Crum—Improving Wire Draws Through Proper Lubrication, Feb. p. 67  
 Cross, J. A. and C. L. Faust—Chemical Machining\*, Aug. p. 521  
 Crum, E. J. and L. C. Crewe, Jr.—Improving Wire Draws Through Proper Lubrication, Feb. p. 67

## -D-

- Dahl, Hjalmar—Assembly Jig Helps Load Riveting Die\*, July p. 66  
 Tube Ends Reduced by Novel Die\*, Feb. p. 61  
 Dallas, Daniel B.—Automatic Assembly of Glass and Steel, Jan. p. 69  
 Electron Beam Welding, July p. 68  
 Keeping Informed—a big problem in engineering, Aug. p. 51  
 Millionths or Microns—which measuring system?, Oct. p. 75  
 Pressworking '62 Features Low-Cost Tooling, Feb. p. 85  
 Daly, Robert—Cam Milling Fixture Is Quick Clamping\*, Sept. p. 82  
 Darnes, C. W., Jr.—Cast Nylon Tooling—better than metals?, Dec. p. 78  
 Davis, Benjamin G.—Engineering Technicians Increase Engineer Productivity, Jan. p. 57  
 DeAmicis, R.—Twelve Ways to Cut Manufacturing Costs, Jan. p. 91  
 Delpidio, D. and G. Driscoll—Semiautomatic Drilling Machine Built from Standard Components, Aug. p. 75  
 DeVon, Leon—Specifying Gears and Splines—for necessity and convenience, Aug. p. 53  
 Dickson, Robert M.—Checking Gage-Block Setups\*, Feb. p. 62  
 Inexpensive Tool Speeds Casting Layout\*, Aug. p. 50  
 Doyle, T. E., P. J. Keenan, W. J. Plant, F. G. Singleton and K. A. Schafer—Thermosetting Acrylics\*, Oct. p. 174  
 Driscoll, G. and D. Delpidio—Semiautomatic Drilling Machine Built from Standard Components, Aug. p. 75

## -E-

- Eary, Donald F.—Press and Die Alignment—key to stamping efficiency, Dec. p. 109  
 Eldridge, W. R.—Assembly Provides Support for Long Components\*, Aug. p. 48  
 Disappearing Locator Insures Pin and Part Alignment\*, Sept. p. 80  
 Retaining Ring Holds Bushings on Assembly Arbor\*, July p. 67  
 Emerson, H. C.—Joining Space Age Metals\*, May p. 275  
 Engquist, R. D.—Resistance Welding of Electronic Assemblies, Oct. p. 89  
 Erdogan, F. O. Tunnel and P. G. Paris—Crack Tip Stress Intensity\*, Sept. p. 215  
 Eskelin, Arnold F.—End Milling of Tough Alloys, Nov. p. 110

## -F-

- Faught, Harry—Block Stabilizes Grinder Shaft\*, Nov. p. 82  
 Fixture Clamp Has Fast Action\*, Oct. p. 66  
 Faust, C. L. and J. A. Cross—Chemical Machining\*, Aug. p. 521  
 Feingold, Norbert—Processing Tool Steels, Nov. p. 113  
 Findley, W. N. and R. M. Reed—Metalcutting Phenomena\*, Oct. p. 171  
 Fingerhut, Henry J.—Single-Point Face Contouring on an Automatic Chucker, June p. 95

- Fink, W. B. and H. K. Schierhold—Filament Winding—Case Maker for Polaris, Nov. p. 101  
 Fogarty, Charles H., H. Cooper and Robert E. Wilbert—Production Flexibility\*, June p. 177  
 Forbes, C. A., H. E. Ricks, Robert S. Ames, J. Byron Jones, Florence R. Meyer, R. J. Lamy and D. H. Lane—Applied Ultrasonics\*, May p. 281  
 Frisch, J. and R. R. Cola—Effects of Electrolytic Grinding\*, May p. 279  
 Fruda, T. R. and H. C. Mouwen—Porous Metal Shapes\*, Nov. p. 189  
 Fussell, D. E., L. C. Too, W. F. Mathewson and J. C. Smith—Sounds and Heat Transfer\*, Nov. p. 187

## -G-

- Gadd, J. D. and R. A. Jefferys—Coating Columbium\*, Jan. p. 160  
 Gajdusek, Josef and Leo Petralska—The CO<sub>2</sub> Process\*, Aug. p. 519  
 Galimberti, J. M. and W. L. Kennicott—How To Eliminate Cutting Tool Vibration, Feb. p. 77  
 Garcin, F. M. J.—How To Design Assembly Machines Through Animated Drawings, Apr. p. 93  
 Gegner, Paul J.—Protection from Corrosion\*, May p. 277  
 Gerber, H. J.—Auxiliary Base Holds Drill Fixtures\*, May p. 88  
 Fixture Design Eliminates Reamer Bushing\*, Feb. p. 60  
 Gibbons, C.—Fixture Holds Screw for Cutoff\*, Nov. p. 81  
 Lathe Chuck Converted for Indexing\*, June p. 62  
 Micrometer Center Finder\*, Feb. p. 62  
 Giordano, Felix M.—Adhesive Bonding Metal Laminates, Aug. p. 57  
 Heavy Stampings Make Strong Parts, Sept. p. 87  
 New Production Process—Mechanical Plating, Mar. p. 82  
 Roll Peen Powder Metal Parts, May p. 125  
 Steam Treating—the Process and Its Applications, July p. 79  
 Wire Joining and Terminating—a guide to equipment and techniques, Dec. p. 81  
 Godfrey, D.—Composition of EP Films\*, Mar. p. 195  
 Golankiewicz, E. J.—Pusher Compensates for Irregularities in Stock Width\*, Dec. p. 76  
 Goldstein, M. H., Karl S. Packard and K. W. Packard—Beyond Reliability\*, Feb. p. 161  
 Green, R. J., D. B. Cox and E. A. Oberight—Radiation and Lubricants\*, Feb. p. 164  
 Grenja, J.—Special Attachment Speeds Wheel Dressing\*, July p. 65  
 Greve, John W.—Gear Checking Method Eliminates Errors, May p. 121  
 Gross, W. B.—Testing with Computers\*, July p. 147  
 Gujral, D. M., N. H. Cook and V. A. Tipnis—Higher Speeds for Punch Presses? May p. 97

## -H-

- Hagstrom, Raymond—New Corrosion Protection for Magnesium Alloys\*, Mar. p. 193  
 Hahn, G. T. and R. I. Jaffee—Brittle Behavior of Materials\*, Oct. p. 171  
 Hamilton, Ken—Special Fixture for Three-Dimensional Milling\*, Aug. p. 49  
 Harvey, Richard F.—Scrambling Flaws Improves Quality of Rolled Parts, Apr. p. 105  
 Hays, L. E. and E. T. Wessel—Fracture of High-Strength Structural Steels\*, Aug. p. 522  
 Heberlein, M. F. W.—Impurities in Lead-Tin\*, Nov. p. 187  
 Helmke, E. C. and W. N. Lambert—Throwaway Inserts Increase Reliability of Machining tests, Dec. p. 85  
 Henderson, John B.—Steel Ball in Bushing Holds Stock During Feeder Advance\*, July p. 67  
 Hobstetter, J. N.—Science of Materials\*, Dec. p. 175  
 Holmes, S. D.—No Drive Dog Required with This Center\*, Dec. p. 76  
 Hug, G. A. O. Schmidt, J. J. Lonergan and J. R. Roubik—Milling with Carbides and Ceramics\*, Oct. p. 172  
 Hull, E. H.—Diamond Burnishing\*, Apr. p. 204  
 Hutley, Floyd A.—Linear Vertex Clearances for Punch and Die Design, Apr. p. 117  
 Hyland, C. R. and A. M. Ayvazian—Taking Short Cuts with Epoxy Plastic Tooling, May p. 103

## -I-

- Incardona, A. and H. H. Poett—Joggling Magnesium Extrusions, July p. 83

Irwin, G. R.—Crack Toughness\*, Sept. p. 216  
Islets, Roger—No Cams Needed in This Multiple-Angle Pierce Die\*, Nov. p. 80  
Tubing Extends Range of Tap\*, Sept. p. 82

—J—

Jablonski, Bernard—Piercing Process Uses the Slug as a Punch, June p. 67  
Jaffee, R. I. and G. T. Hahn—Brittle Behavior of Materials\*, Oct. p. 171  
Jefferson, T. B. and G. Woods—Close Control Key to Welding Tool Steels, June p. 92  
Jefferys, R. A. and J. D. Gadd—Coating Columbium\*, Jan. p. 160  
Johnson, Allen M.—Gage Checks Eccentricity of Deep Holes\*, May p. 90  
How To Design Circular Recessing Tools, Feb. p. 63  
Reciprocating Slide Tests Moving Components\*, June p. 62  
Jones, J. Byron, Florence R. Meyer, R. J. Lanyi, D. H. Lane, C. A. Forbes, H. E. Ricks and Robert S. Ames—Applied Ultrasonics\*, May p. 281  
Jost, H. D.—Tests for Phenolics\*, Nov. p. 187

—K—

Kaera, Kaarel—Three-Pin Plate Speeds Corner Pickup\*, Oct. p. 66  
Kasper, Louis—Swivel Device Transfers Movement, Eliminates Stick-Slip\*, Apr. p. 86  
Kattus, J. R. and H. L. Lessley—Creep of Sheet Metals\*, Feb. p. 161  
Keccegioglou, Dimitri and George M. Tomko—Machinability of Cast Iron, Jan. p. 95  
Keenan, P. J., W. J. Plant, F. G. Singleton, K. A. Schafer and T. E. Doyle—Thermosetting Acrylics\*, Oct. p. 174  
Kennicott, W. L. and J. M. Galimberti—How To Eliminate Cutting Tool Vibration, Feb. p. 77  
King, B. W. and R. J. Runck—The Glass in FRP\*, Mar. p. 197  
Kitake, E. D. and R. J. McGray—Molds in Cutting Fluids\*, Aug. p. 520  
Klubertanz, R. J.—Fixture Provides Presetting of Boring Bars\*, Mar. p. 80  
Kobayashi, S., E. G. Thomsen and Y. Bocharov—Research in Coining\*, May p. 279  
Ku, P. M., R. D. Brown and R. A. Burton—Friction and Wear of Ceramets\*, Mar. p. 194  
Kunsenbacher, A. A.—Grinding Coolants\*, Aug. p. 519

—L—

LaCoursiere, Andrew J.—Curved Shafts Drive Close-Proximity Drills\*, Dec. p. 75  
Lacy, C. C. and L. Albertin—Heat-Treat Technique\*, June p. 178  
Lambert, W. N. and E. C. Helmke—Throwaway Inserts Increase Reliability of Machining Tests, Dec. p. 85  
Lane, D. H., C. A. Forbes, H. E. Ricks, Robert S. Ames, J. Byron Jones, Florence R. Meyer and R. J. Lanyi—Applied Ultrasonics\*, May p. 281  
Lanyi, R. J., D. H. Lane, C. A. Forbes, H. E. Ricks, Robert S. Ames, J. Byron Jones and Florence R. Meyer—Applied Ultrasonics\*, May p. 281  
Lascoe, O. D.—Plastic Tooling\*, June p. 177  
Lehman, Roger—Simulated Rocket Stage Tests a Transporter, Nov. p. 83  
Lessley, H. L. and J. R. Kattus—Creep of Sheet Metals\*, Feb. p. 161  
Lettau, William H.—Fixture Simplifies Reamer Sharpening\*, Dec. p. 77  
Levesque, George N.—Hydrostatic Spindles Hold Roundness to Millionths, Oct. p. 67  
Levi, R. and V. Sambrotto—Easier Machining Tests\*, Sept. p. 217  
Lewis, A. H. and W. S. Tucker—Diamond Dresser Improves Form Grinding Accuracy, Mar. p. 107  
Lewis, T. G.—Machining to Millionths, Aug. p. 65  
Lindenmeyer, Ray S.—Device Simplifies Bushing Removal\*, Mar. p. 79  
Liu, H. W.—Fatigue Cracks\*, Aug. p. 526  
Loftus, M. W.—Fixture Design Eliminates Burrs\*, Apr. p. 86  
Lathe Fixture Holds Angle Iron for End Facing\*, Mar. p. 80  
Nut Serves as Fixture in Grinding a Dog Point\*, Feb. p. 61  
Saw Blade Performs Broaching Operations\*, Jan. p. 59  
Loneragan, J. J., J. R. Roubik, G. Hug and A. O. Schmidt—Milling with Carbides and Ceramics\*, Oct. p. 172

\*Brief article less than 1 page.

Marin, Joseph—Creep of Riveted Joints\*, Feb. p. 163  
Marshall, D. W. and F. J. McGarry—Wire Reinforced Plastics\*, Nov. p. 188  
Mathewson, W. F., J. C. Smith, D. E. Fussell and L. C. Too—Sounds and Heat Transfer\*, Nov. p. 187  
Mead, D. J.—Damping Treatments\*, Feb. p. 161  
Meissner, R. C.—Engineering Without Drudgery\*, Dec. p. 175  
Meyer, Florence R., R. J. Lanyi, D. H. Lane, C. A. Forbes, H. E. Ricks, Robert S. Ames and J. Byron Jones—Applied Ultrasonics\*, May p. 281  
Miller, Robert R.—The Turn Mill\*, Aug. p. 520  
Mohun, W. A.—Abrasive Disk Grinding\*, Apr. p. 203  
Monaco, Guy—Universal Fixture for Drilling Holes on Bolt Circles\*, May p. 89  
Monroe, Harry—Maintenance of Numerical Controls on Machine Tools\*, Mar. p. 195  
Monteil, V. H.—Techniques of Explosive Forming\*, Jan. p. 158  
Moore, Charles E.—Industrial Inspection\*, Sept. p. 215  
Morrisroe, G. L.—Government-Owned Tooling—Its Control, Use, Disposition, Mar. p. 75  
Morse, C. W.—Effective Management of Manufacturing Engineering Projects, Oct. p. 61  
Long-Range Planning—its role in manufacturing, Sept. p. 77  
Mote, C. W.—Ring Rolling\*, June p. 177  
Mouwun, H. C. and T. R. Fruda—Porous Metal Shapes\*, Nov. p. 189  
Moyar, G. J. and G. M. Sinclair—Plastic Deformation and Rolling\*, Sept. p. 215  
Mulholland, James—Piercing Punch Performs Three Operations\*, June p. 64  
Munroe, R. A.—Adhesive Bonding Magnesium\*, Mar. p. 193  
Murata, R. and T. Takeyama—Tool Wear\*, May p. 278  
Murray, Frank—Clamping Device Simplifies Corner Welding\*, Jan. p. 59  
Gage Measures Taper in Conical Parts\*, Apr. p. 87

—Mc—

McGarry, F. J. and D. W. Marshall—Wire Reinforced Plastics\*, Nov. p. 188  
McGray, R. J. and E. D. Kitake—Molds in Cutting Fluids\*, Aug. p. 520  
McKewen, George E.—Air Mounts Maintain Surface Plate Flatness, Apr. p. 99  
McLaughlin, A. D.—Fixture Simplifies Number Stamping Operation\*, Nov. p. 80  
McLaughlin, Clint—Pierce Die Has Automatic Indexer\*, Nov. p. 82  
Spring Steel Speeds Indicating\*, May p. 89

—N—

Newhouse, D. L.—Fracture of Alloy Steels\*, Sept. p. 217  
Newman, Patrick—Drill Bushing Always on Shaft Centerline\*, Oct. p. 65  
Jig Plate Toolholder Simplifies Lathe Drilling\*, July p. 66  
Special Holder Speeds Indicator Operation\*, Apr. p. 86  
Newman, S. F.—Why GM Electrical Standards\*, Aug. p. 521  
Nichols, L. W.—Unit Moves Hot, Heavy Work\*, Oct. p. 65  
Nickel, K. W.—Rating Vendors\*, Sept. p. 215  
Norquist, Warren E.—Evaluating the Quality Data System, Nov. p. 75

—O—

Oberright, E. A., D. B. Cox and R. J. Green—Radiation and Lubricants\*, Feb. p. 164  
Okusa, Kitao—How Carbide Tools Fail, Apr. p. 88  
Owen, Thomas J.—Choose the Right Thread Gage for the Job, May p. 113

—P—

Packard, Karl S., K. W. Packard and M. H. Goldstein—Beyond Reliability\*, Feb. p. 161  
Packard, K. W., M. H. Goldstein and Karl S. Packard—Beyond Reliability\*, Feb. p. 161  
Pardo, Jose G.—Cross-Slide Increases Lathe Accuracy\*, Mar. p. 81  
Paris, P. G., F. Erdogan and O. Tuncel—Crack Tip Stress Intensity\*, Sept. p. 215  
Partridge, F. M. and J. R. Russell—Layouts Transferred Photographically to Contoured Parts, May p. 110  
Peregoy, F. C. and B. B. Turney—Electric Controls Increase Safety of Machine Tools\*, Feb. p. 163  
Petrala, Leo and Josef Gajdusek—The CO<sub>2</sub> Process\*, Aug. p. 519  
Phillips, Bryce W.—Applying Value Analysis to Machine Tool Procurement, June p. 59  
Plant, W. J., F. G. Singleton, K. A. Schafer, T. E. Doyle and P. J. Keenan—Thermosetting Acrylics\*, Oct. p. 174  
Plenard, Elisabeth—Damping of Cast Iron\*, July p. 149

Poett, H. H. and A. Incardona—Joggling Magnesium Extrusions, July p. 83  
Poston, Irvin E.—Tooling with Plastics\*, Aug. p. 526  
Powers, Thomas—Increase the Effectiveness of Automatics, Sept. p. 105  
Punja, K. K. and R. C. Brewer—Orthogonal Machining\*, Nov. p. 189

—R—

Reed, R. M. and W. N. Findley—Metalcutting Phenomena\*, Oct. p. 171  
Reingold, Alvin—Ceramic Dies Speed Honeycomb Production, Mar. p. 97  
Reynolds, H. W. and S. J. Wheatley—New Machine Uses Broach for Ferrule Removal, Nov. p. 107  
Rheinhold, Lawrence M.—Capabilities of Steel Rule Dies, June p. 79  
Rice, W. B., R. Salmon and S. N. Chopra—Chip Formation\*, Oct. p. 172  
Ricks, H. E., Robert S. Ames, J. Byron Jones, Florence R. Meyer, R. J. Lanyi, D. H. Lane and C. A. Forbes—Applied Ultrasonics\*, May p. 281  
Riley, Frank J.—Design of Automatic Assembly Machines, May p. 91  
Riley, John J.—The How and Why of Machine Capability Analysis, Sept. p. 97  
Rinehart, John S.—Metalworking Explosives\*, Jan. p. 157  
Robinson, J. M.—Ballizing—the Engineering of Holes, June p. 65  
Rothman, E. A. and R. F. Broderick—Shot-Peening Aluminum\*, Oct. p. 172  
Roubik, J. R., G. Hug, A. O. Schmidt and J. Loneragan—Milling with Carbides and Ceramics\*, Oct. p. 172  
Rowe, G. H. and J. R. Stewart—Creep Rupture of a Welded Stainless Steel\*, Oct. p. 173  
Runck, R. J. and B. W. King—The Glass in FRP\*, Mar. p. 197  
Russell, J. R. and F. M. Partridge—Layouts Transferred Photographically to Contoured Parts, May p. 110

—S—

Salmon, R., S. N. Chopra and W. B. Rice—Chip Formation\*, Oct. p. 172  
Sambrotto, V. and R. Levi—Easier Machining Tests\*, Sept. p. 217  
Sata, Toshio and Hiroyuki Yoshikawa—Grinding Wheel Wear\*, Apr. p. 204  
Schafer, K. A., T. E. Doyle, P. J. Keenan, W. J. Plant and F. G. Singleton—Thermosetting Acrylics\*, Oct. p. 174  
Scherhold, H. K. and W. B. Fink—Filament Winding—Case Maker For Polaris, Nov. p. 191  
Schmidt, A. O., J. J. Loneragan, J. R. Roubik and G. Hug—Milling with Carbides and Ceramics\*, Oct. p. 172  
Sejourant, Jacques—Glass as Lubricant\*, Aug. p. 520  
Shirajev, W. V. and P. F. Vassilevsky—Cooling of Steel Castings\*, July p. 150  
Siekmann, H. J.—Oxide Tools up to Date, June p. 69  
Silverman, R., L. S. Castleman and W. E. Buescher—Properties to Order\*, Nov. p. 188  
Sim, P. J. and J. W. Bell—Optical Tooling Checks Furnace Roll Alignment, Mar. p. 99  
Simms, Charles C.—Process Planning for Outer Space, Feb. p. 55  
Sinclair, G. M. and G. J. Moyar—Plastic Deformation and Rolling\*, Sept. p. 215  
Singh, Inder Jeet—Special Faceplate Simplifies Threading and Graduating\*, May p. 88  
Singleton, F. G., K. A. Schafer, T. E. Doyle, P. J. Keenan and W. J. Plant—Thermosetting Acrylics\*, Oct. p. 174  
Sjostedt, William E.—Axial Jaws Simplify Chucking of Fragile Parts\*, Sept. p. 81  
Skwarek, S.—Reinforced Refractories\*, Feb. p. 164  
Smith, J. C., D. E. Fussell, L. C. Too and W. F. Mathewson—Sounds and Heat Transfer\*, Nov. p. 187  
Smith, W. B.—Special Tool Makes Uniform Chamfers\*, June p. 63  
Souler, R. Allen—Putting Automatic Gaging to Work, Jan. p. 77  
Spencer, C. D.—Casting Plastics\*, June p. 178  
Sperman, Jacob H.—Hack Saw Die Cuts Tubing\*, Sept. p. 80  
Sprengel, Howard W.—A New Approach to Quality Manufacturing, Feb. p. 92  
Staskauskas, Albert E.—Clock Winder Taps Holes\*, Aug. p. 49  
Nut Runner Made From Socket Head Screw\*, May p. 90  
Staton, G., A. Chaffin, and R. J. Brachman—Diagnosing Failures\*, July p. 147  
Stewart, J. R. and G. H. Rowe—Creep Rupture of a Welded Stainless Steel\*, Oct. p. 173  
Strasser, Federico—Double Action Die Compensates for Short Press Stroke\*, Sept. p. 82  
Double Locator Saves Metal\*, Jan. p. 60  
Swing, Ekton—Measurement of Castings\*, July p. 149

# 1962 SUBJECT INDEX

—A—

- Abrasive blasting, airless\*, Aug. p. 74  
 Abrasive disk grinding, Apr. p. 203  
 Abrasives, diamond\*, Jan. p. 94  
 Abstracts, use of in indexing systems, Aug. p. 51  
 Acceptance sampling, Nov. p. 77  
 Accountable tooling, definition of, Mar. p. 76  
 Acrylics, thermosetting\*, Oct. p. 174  
 Adapter, magnetic for checking spindle runout\*, Oct. p. 64  
 Adhesive bonding, magnesium\*, Mar. p. 193  
 of metal laminates, Aug. p. 57  
 Air-electric gaging, Jan. p. 77  
 Air-electronic gaging, Jan. p. 77  
 Airfoil blades, machining, Aug. p. 59  
 Air gage for transmission inspection\*, Oct. p. 74  
 Air mounts, use in maintaining surface-plate flatness, Apr. p. 99  
 Alignment, press and die, Dec. p. 109  
 Alloy performance, predictability of\*, Sept. p. 110  
 Alloy steel, fracture of\*, Sept. p. 217  
 Alloy strip, powder rolled cathode\*, Nov. p. 188  
 Alloys, high-temperature, machining\*, Oct. p. 153  
 precipitation-hardening, brazing of, May p. 275  
 refractory, joining of, May p. 275  
 Alloys, thermal-resistant, classes of, Nov. p. 110  
 machining of, Nov. p. 110  
 Aluminum (1100-0), formability, Jan. p. 63  
 6061-T6, formability, Jan. p. 63  
 half-hard, stamping, Sept. p. 96  
 shot-peening\*, Oct. p. 172  
 steam treating of, July p. 81  
 Aluminum oxide, tools, June p. 69  
 stones, Nov. p. 93  
 use of in lasers, June p. 86  
 use of in vibratory finishing, Nov. p. 97  
 Angle plate, magnetic\*, Mar. p. 79  
 Argon gas, Mar. p. 98  
 Army metrology, Oct. p. 76  
 Assembly arbor\*, July p. 67  
 Assembly, automatic, glass and steel, Jan. p. 69  
 Assembly jig for riveting die\*, July p. 66  
 Assembly machines, automatic, design of, May p. 91  
 design of, Apr. p. 93  
 Austenitic stainless steels, producibility rating of, May p. 101  
 Autocollimation telescope\*, May p. 243  
 Autocollimator, use in machine building, Aug. p. 66  
 Autopart programming, Nov. p. 105  
 Automated wire crimping, Dec. p. 83  
 Automatic assembly, glass and steel, Jan. p. 69  
 Automatic chucker, contouring on, June p. 95  
 Automatic gaging, Jan. p. 77  
 Automatics, increasing effectiveness of, Sept. p. 105  
 Automation, circumferential, May p. 82  
 in barrel plating\*, Nov. p. 112  
 in vibratory finishing, Nov. p. 94  
 management attitudes toward, May p. 92  
 press, Feb. p. 85  
 Autospot programming, Nov. p. 105

\*Brief article less than 1 page.

—B—

- Backlash, elimination of in boring unit, Nov. p. 92; Dec. p. 155\*  
 Ball bearings, resilience of\*, Jan. p. 151  
 Ball burnishing\*, Jan. p. 151  
 Ball nuts, recirculating, Apr. p. 98  
 Ballizing, June p. 65  
 Balls, steel, use of in vibratory finishing, Nov. p. 97  
 Bandaw contouring of honeycomb, Mar. p. 85  
 Barrel finishing compared with vibratory finishing, Nov. p. 94  
 Barrel plating, automatic in-line\*, Nov. p. 112  
 Bearing capacity of coated steels\*, Aug. p. 519  
 Bearing strength errors\*, Oct. p. 85  
 Bench presses, use in wire terminating, Dec. p. 82  
 Beryllium copper, steam treating of, July p. 81  
 Beryllium-nickel\*, Mar. p. 101  
 Beta distribution curve, June p. 76  
 Binary combinations, modified, Oct. p. 73  
 Blow molding\*, Feb. p. 163  
 Bonding of oxide tools, June p. 70  
 Bonus tolerances, Oct. p. 79  
 Boring attachment, milling machine\*, Oct. p. 66  
 Boring bar, eccentric\*, Aug. p. 50  
 Boring bars, composite, Feb. p. 79  
 Boring machine for centrifugal pump, Oct. p. 87  
 Boring mill vibrations\*, Sept. p. 201  
 Boring unit, preloaded, Nov. p. 92  
 Brass, half-hard, stamping, Sept. p. 96  
 steam treating of, July p. 81  
 Brazing sandwich panel, June p. 83  
 Breakage, characteristics of, May p. 97  
 Brittle behavior of materials\*, Oct. p. 171  
 Broach material, Nov. p. 108  
 Broaching, Feb. p. 69  
 machine design, May p. 108  
 operations, saw blade\*, Jan. p. 59  
 Brock needle\*, Dec. p. 107  
 Buffing, automatic, Jan. p. 73  
 Burnishing, ball\*, Jan. p. 151  
 broach, Feb. p. 69  
 diamond\*, Apr. p. 204  
 Burr formation, characteristics and causes in stamping, May p. 99  
 Bushing assembly device\*, July p. 67  
 Bushing plate, self-centering\*, Oct. p. 65  
 Bushing removal device\*, Mar. p. 79

—C—

- Calcium soap in lubricating, Feb. p. 67  
 Calculating machine capability, Sept. p. 98  
 Cam milling fixture\*, Sept. p. 82  
 Capron\*, Sept. p. 201  
 Carbide, abrasives, Mar. p. 102  
 electrolytic grinding of\*, Dec. p. 155  
 dies, Feb. p. 89  
 milling cutters, failures in\*, Apr. p. 186  
 milling with\*, Oct. p. 172  
 tips, fatigue strength of\*, Feb. p. 149  
 tool manufacturing research\*, Apr. p. 186  
 tools, failure in, Apr. p. 88  
 versus steel, Feb. p. 78  
 Cast nylon tooling, Dec. p. 78

- Cast iron, damping of vibration in\*, July p. 149  
 finish rolling of\*, Feb. p. 151  
 oxygen-lanced\*, July p. 148  
 production of, Feb. p. 80  
 steam treating of, July p. 81  
 Casting, centrifugal, Aug. p. 47  
 of cylinder blocks, July p. 85  
 plastics\*, June p. 178  
 Castings, inspection of\*, Sept. p. 108  
 measurement of\*, July p. 149  
 Cemented oxide, June p. 69  
 Center finder, micrometer\*, Feb. p. 62  
 Centrifugal casting, Aug. p. 47  
 Centrifuge\*, Dec. p. 106  
 Ceramic dies, Mar. p. 97  
 Ceramics, milling with\*, Oct. p. 172  
 use of in vibratory finishing, Nov. p. 97  
 Cermet, friction and wear of\*, Mar. p. 194  
 Chamfering tool\*, June p. 63  
 Channeling, in wire draws, Feb. p. 68  
 Chemical machining\*, Aug. p. 521  
 Chip formation\*, Oct. p. 172  
 Chipping in cutting tools, Apr. p. 88  
 Chuck loading device\*, Sept. p. 81  
 Chucking device\*, Sept. p. 81  
 Circuit board manufacture, Sept. p. 109  
 Circular part locating device\*, July p. 65  
 Circular recessing tools, design, Feb. p. 63  
 Clamp, fixture, fast acting\*, Oct. p. 66  
 Clamping force of collets\*, Mar. p. 190  
 Clearance, cutting, control of, Dec. p. 109  
 CO<sub>2</sub> process\*, Aug. p. 519  
 Coated steels, bearing capacity of\*, Aug. p. 519  
 Coating, columbium\*, Jan. p. 160  
 Cobalt-base alloys, producibility rating, May p. 101  
 components, machine welding of\*, Oct. p. 88  
 Cocoons, filament wound, Nov. p. 102  
 Coining, research in\*, May p. 279  
 Cold extrusion\*, Aug. p. 524  
 Collets, clamping force\*, Mar. p. 190  
 Columbium, coating\*, Jan. p. 160  
 Combination clamp and locator\*, Dec. p. 76  
 Composite boring bars, Feb. p. 79  
 Computers, Jan. p. 58  
 control of rolling mill, Dec. p. 92  
 testing with\*, July p. 147  
 Concrete, in explosive forming, Jan. p. 63  
 Confidence interval, Nov. p. 77  
 Contact operations (see Explosive forming)  
 Contouring of honeycomb, Mar. p. 85  
 Control inspection in assembly machines, May p. 93  
 Control records, Mar. p. 76  
 Controlled ventilation panes, assembly of, Jan. p. 70  
 Controls, electric\*, Feb. p. 163 (see also Numerical control)  
 Coolants, grinding\*, Aug. p. 519  
 Copper, formability, Jan. p. 63  
 rolled, stamping, Sept. p. 96  
 welding of, July p. 72  
 Corner pickup plate\*, Oct. p. 66  
 Corrosion prevention\*, May p. 277  
 protection for magnesium alloys\*, Mar. p. 193  
 protection of metal, Mar. p. 82  
 Cost, determination of by value analysis, June p. 78  
 Cost distribution curve, June p. 77  
 Costs, manufacturing, Jan. p. 91

Crack toughness\*, Sept. p. 216  
 Cracking, underbead, June p. 93  
 Crankshaft machining, Feb. p. 71  
 Cratering in cutting tools, Apr. p. 89  
 Creep, of riveted joints\*, Feb. p. 163  
 rupture of welded stainless steel\*, Oct. p. 173  
 Cross slide increases lathe accuracy\*, Mar. p. 81  
 Cupola design, Feb. p. 81  
 Cutoff mechanism in spring machines, Apr. p. 104  
 Cutting fluids, molds in\*, Aug. p. 520  
 Cutting force dynamometers\*, May p. 244  
 Cutting, orthogonal, Apr. p. 89  
 temperatures for oxide inserts, June p. 70  
 three-dimensional, Apr. p. 92  
 Cutting tool costs, Dec. p. 71  
 Cutting tool development, Aug. p. 45  
 Cutting tool manual (Sikorsky), Dec. p. 74  
 Cutting tools, failures, Apr. p. 88  
 high-speed, Jan. p. 88  
 vibration, Feb. p. 77  
 Cylindrical griader, supporting device\*, Aug. p. 48

—D—

Damping of vibration, Feb. p. 78  
 in cast iron\*, July p. 149  
 Data system, quality, evaluating, Nov. p. 75  
 Deburring, by vibratory finishing, Nov. p. 94  
 with carbide abrasives, Mar. p. 102  
 Decarburization, occurrence in welding, June p. 93  
 Deformation of machine tools\*, June p. 165  
 Dental tools in deburring, Mar. p. 102  
 Deposition rates for welding, Nov. p. 86  
 Depth gage device\*, Apr. p. 86  
 Descaling by vibratory finishing, Nov. p. 94  
 Design, aluminum oxide tools, June p. 70  
 precision machine, Aug. p. 65  
 stampings, Sept. p. 89  
 trends in automatic chucking machines, May p. 84

 Epoxy plastic tooling, May p. 103  
 Epoxy-resin laminate, Feb. p. 83  
 Erich facial fracture appliance\*, Dec. p. 108  
 Error, automatic compensation for\*, May p. 246  
 Estimating tool costs, Apr. p. 81  
 Expendable tooling, definition of, Mar. p. 76  
 storing of, Oct. p. 84  
 Explosive forming, Jan. p. 61; Jan. p. 158\*; Apr. p. 112  
 Explosive gas mixtures, Jan. p. 64  
 Explosive rubber impact forming, Apr. p. 113  
 Explosives, metalworking\*, Jan. p. 157  
 Extrusion, cold\*, Aug. p. 524  
 hydrostatic\*, July p. 82  
 Extrusions, magnesium, joggling, July p. 83

—F—

Fabricated machine tools\*, Oct. p. 154  
 Face milling, centrifugal forces in\*, Apr. p. 185  
 Faceplate, special\*, May p. 88  
 Fastening costs, estimating, Aug. p. 69  
 Fastening costs, table of, Aug. p. 70  
 Fastening operations in assembly machines, May p. 96  
 Fatigue cracks\*, Aug. p. 526  
 Fatigue strength of carbide tips\*, Feb. p. 149  
 Fatigue, unified engineering theory of\*, Jan. p. 157  
 Feeding device, for automatic assembly machines, May p. 94  
 stock\*, July p. 67  
 Ferrosioferric oxide\*, Mar. p. 195  
 Ferrous metal, steam treating of, July p. 79  
 Ferrules, removal of, Nov. p. 107  
 Fiberglass in explosive forming, Jan. p. 63  
 in reinforced plastics\*, Mar. p. 197  
 use of in filament winding, Nov. p. 101  
 Filament winding, Nov. p. 101  
 Filler wire in arc welding\*, Oct. p. 155  
 Finishing compounds, use of in vibratory finishing, Nov. p. 99  
 Fixture, cam milling\*, Sept. p. 82  
 dog-point grinding\*, Feb. p. 61  
 drill, indexing\*, June p. 63  
 for pin and part alignment\*, Sept. p. 80  
 for presetting boring bars\*, Mar. p. 80  
 for three-dimensional milling\*, Aug. p. 49  
 number stamping\*, Nov. p. 80  
 numerically controlled boring, Jan. p. 90  
 part holding, epoxy, May p. 104  
 reamer sharpening\*, Dec. p. 77  
 screw cutoff\*, Nov. p. 81  
 tapping, acme threads\*, June p. 64  
 Fixture clamp, fast acting\*, Oct. p. 66  
 Fixture design, scientific\*, Nov. p. 165  
 Fixtures, welding, mechanized, Nov. p. 88  
 Fixturing for vibratory finishing, Nov. p. 99  
 Fixturing of honeycomb, Mar. p. 86  
 Flame cutting, numerically controlled, May p. 109  
 Flank wear patterns in cutting tools, Apr. p. 92  
 Flatness, surface plate, Apr. p. 99  
 Flaws, scrambling, Apr. p. 105  
 Fluorescence in lasers, June p. 86  
 Flux redistributor, July p. 78  
 Flywheels, automatic assembly, Jan. p. 74  
 Forging, automated, July p. 76  
 spin, Mar. p. 105  
 Forgings, cold rolling of\*, Jan. p. 89  
 Formability, Jan. p. 62  
 Forming, electrohydraulic, Jan. p. 61  
 electromagnetic, Jan. p. 66  
 explosive, Jan. p. 61; Jan. p. 158\*  
 high-energy-rate, Jan. p. 61; Mar. p. 90  
 of titanium, Apr. p. 115  
 pneumatic-mechanical, Jan. p. 67  
 rubber impact, Apr. p. 113  
 Forming machines, pneumatic-mechanical, Jan. p. 61  
 Fracture modes in stamping, May p. 97  
 Freon 11, Mar. p. 98  
 Friction and wear of cermets\*, Mar. p. 194  
 Functional dimensioning, Oct. p. 79  
 Furnace, parabolic, July p. 78  
 Furnace roll alignment, Mar. p. 99

Stress relieving of welds, June p. 93  
Surface finish, determining\*, Sept. p. 202  
Surface plate flatness, Apr. p. 99

—T—

Tantalum, formability, Jan. p. 63  
Tap wrench, Aug. p. 49\*; Sept. p. 82\*  
Taper gage\*, Apr. p. 87  
Tapping fixture for acme threads\*, June p. 64  
Tapping screws, selection, Dec. p. 93  
Technicians, engineering, Jan. p. 57  
training of, Jan. p. 58  
Technological competition, U.S. vs. U.S.S.R., Oct. p. 76  
Temperature welding in cutting tools, Apr. p. 89  
Tensile failure in punching, May p. 98  
Tensile stress, ratio of to shear stress in punching, May p. 98  
Testing endurance\*, June p. 62  
Testing machine for stressing aluminum alloys\*, Oct. p. 88  
Testing of transporters, Nov. p. 83  
Testing with computers\*, July p. 147  
Thermal-resistant alloys, machining of, Nov. p. 110  
Thermal shock in welding, minimizing, June p. 94  
Thermosetting acrylics\*, Oct. p. 174  
Thread gages, selection of, May p. 113  
Thread rolling, parts orientation for, Oct. p. 70  
Tin-lead, impurities in\*, Nov. p. 187  
Titanium, alloys, producibility rating, May p. 101  
(B120 VCA), formability, Jan. p. 63  
(6Al-4V), formability, Jan. p. 63  
pressworking of, Apr. p. 115  
thin, welding of, June p. 82  
welding of, July p. 70  
Tolerances, bonus, Oct. p. 79  
Tonnage meter\*, Mar. p. 93  
Tonnage requirements for mild steel, Sept. p. 96  
Tool care, Mar. p. 77  
Tool, chamfering\*, June p. 63  
Tool control, Oct. p. 83  
cards, Oct. p. 83  
program, Dec. p. 71  
Tool costs, Apr. p. 81  
Toolcrib organization, Oct. p. 83  
Tool design, aluminum-oxide tools, June p. 70  
for machining thermal-resistant alloys, Nov. p. 112  
requirements, Mar. p. 77  
Tool failures, examples of, Apr. p. 90  
Tool geometry in metalcutting\*, Oct. p. 171  
Tool identification, Mar. p. 78  
Tool leasing program\*, July p. 74  
Tool steel heat-treatment temperatures, June p. 94  
Tool steels (see Alloys, see Steel)  
Tool storage, Oct. p. 83  
Tool wear\*, May p. 278  
Tooling, accountable, definition of, Mar. p. 76  
cast nylon, Dec. p. 78  
design for furnace brazing, May p. 275  
electron beam, July p. 70  
epoxy plastic, May p. 103  
expendable, definition of, Mar. p. 76  
explosive forming, Jan. p. 62  
explosive-gas forming, Jan. p. 66  
for automatics, Sept. p. 106  
for powder-metal parts, Sept. p. 94  
for short-run manufacturing, Sept. p. 109  
for the handicapped\*, May p. 117  
government-owned, Mar. p. 75  
hard, definition of, Mar. p. 76  
insert, in broaching, Sept. p. 92  
low-cost, Feb. p. 85

Tooling (cont.)  
medical, Dec. p. 104  
optical, Mar. p. 99  
package, Aug. p. 45  
plastic\*, June p. 177  
polyurethane, Feb. p. 90  
short-run, Mar. p. 92  
soft, definition of, Mar. p. 76  
with plastics\*, Aug. p. 526  
Toolroom efficiency, Apr. p. 81  
Tools, aluminum-oxide, June p. 69  
commercial modified, Dec. p. 74  
commercial standard, Dec. p. 74  
identification of, Dec. p. 73  
multiple purpose special, Dec. p. 74  
single purpose special, Dec. p. 74  
Torch cluster, mobile, July p. 75  
Torque tension tester, Apr. p. 106  
Torque variations, use in machine control, June p. 84  
Tracer control, Nov. p. 90  
Tracer control in milling, Aug. p. 59  
Transfer assembly machine, Jan. p. 69  
Transfer device for stampings, Apr. p. 98  
Transfer machine, automatic assembly, Jan. p. 74  
Transistor-controlled rectifiers\*, Aug. p. 522  
Trunnion type milling and drilling machine, June p. 74  
Tube drawing, ultrasonic\*, Aug. p. 58  
Tube failure in machine tools, Apr. p. 96  
Tube sizing die\*, Feb. p. 61  
Tubing, stainless steel, bending of, Sept. p. 104  
Tumbling stamped parts, Mar. p. 84  
Tungsten inert gas welding, July p. 70  
Tungsten, joining of, May p. 275  
Turbine shafts, rolling of\*, Jan. p. 89  
Turn mill\*, Aug. p. 520  
Turret lathe, punch card control of\*, May p. 244

—U—

Ultrasonic gaging, May p. 118  
Ultrasonic machining, Feb. p. 89  
Ultrasonic testing of castings\*, Sept. p. 108  
Ultrasonic tube drawing\*, Aug. p. 58  
Ultrasonic welding\*, May p. 119; May p. 276  
Ultrasonics, applied\*, May p. 281  
Underhead cracking, June p. 93  
Unit term indexing, Aug. p. 52  
UPPS machine, Aug. p. 65

—V—

Vacuum brazing, June p. 83  
Value analysis, June p. 59  
Vascojet 1000, formability, Jan. p. 63  
Vendor rating systems\*, Sept. p. 215  
Vernier, optical, Apr. p. 97  
Vibration, boring mill\*, Sept. p. 201  
cutting tool, Feb. p. 77  
dampening, Dec. p. 78  
damping\*, Feb. p. 161  
damping in machine tools\*, Jan. p. 152  
decay rates, Feb. p. 78  
effects on surface plates, Apr. p. 100  
self-induced in metalcutting\*, May p. 276  
Vibratory feeders, May p. 94  
Vibratory finishing\*, Apr. p. 107  
fundamentals of, Nov. p. 93  
limitations of, Nov. p. 96  
special characteristics of, Nov. p. 96

—W—

Ways, protection of\*, Feb. p. 149  
Wear in grinding wheels\*, Apr. p. 204  
Weld characteristics, electron beam, July p. 69  
Weld cracking, June p. 92  
Welded stainless steel, creep rupture\*, Oct. p. 173  
Welding, arc, filler wire in\*, Oct. p. 155  
automatic, Nov. p. 87  
corner\*, Jan. p. 59 (see also Joining)  
electron beam, July p. 68; Oct. p. 82  
explosive, Jan. p. 68  
helix-wound tubes\*, Feb. p. 150  
inert gas shield, June p. 82  
mechanized, Nov. p. 85  
mobile, Nov. p. 106  
of dissimilar materials, July p. 70  
of tool steels, June p. 92  
refractory metals\*, July p. 92  
resistance, metallurgy of, Oct. p. 89  
semiautomatic, Nov. p. 87  
submerged-arc, Nov. p. 87  
tool steels, June p. 92  
tungsten inert gas, July p. 70  
ultrasonic\*, May p. 119; May p. 276  
vapor shielded, Nov. p. 87  
with lasers, June p. 85  
Welding fixtures, mechanized, Nov. p. 88  
Welding machines, resistance, Oct. p. 92  
Welds, stress relieving of, June p. 93  
Wheel dressing with diamond cutters, Mar. p. 107  
Wire drawing, Feb. p. 67; Oct. p. 171\*  
Wire joining and terminating, Dec. p. 81  
Wire reinforced plastics\*, Nov. p. 188  
Wiring by numerical control, June p. 72  
Words, use of in programming\*, June p. 71  
Writing of engineering reports, Feb. p. 72

—Z—

Zone melting\*, Jan. p. 159
